

Fortinet NSE 8 Brochure

Fortinet NSE 8 / Fortinet Certified Expert (FCX) Course Training in Mumbai, India

Course Highlights

Training Mode - Classroom and Online

Learning Method - Lecture & Self-Study

Duration - 2 Months

Training Hours - 2 Hours per day

Hands on Labs - Yes

Study Material - Yes

Certificate - Yes

Batches - Weekdays (Mon-Fri) & Weekend (Sat-Sun) -

Fortinet NSE 8 Certification Overview

In an age where cyber threats are increasingly sophisticated and relentless, the importance of advanced security knowledge and skills cannot be overstated. The Fortinet NSE 8 Certification is recognized globally as a gold standard for network security professionals. It's a rigorous and comprehensive certification that covers every aspect of network security, making it one of the most sought-after certifications in the industry.

The Fortinet Network Security Expert (NSE) 8 Certification is the pinnacle of Fortinet's comprehensive certification program, designed to prove an individual's expertise in Fortinet's network security products and services.

The primary goal of the NSE 8 certification is to validate your ability to design, implement, administer, and troubleshoot Fortinet security devices in a complex network environment.

This includes a wide range of products covering various aspects of network security, such as firewalls, VPNs, anti-virus, intrusion prevention, web filtering, and anti-spam, among others.

Earning the NSE 8 certification places you among an elite group of security professionals capable of handling the most complex and challenging network security scenarios.

It shows that you possess not only the technical expertise required to secure modern networks but also a deep understanding of the cybersecurity landscape and the ability to think critically and strategically in the face of emerging threats.

CCIE Enterprise Infrastructure v1.1 Certification Course Details

Course Duration: 4 month of Instructor-led classroom training

Who should enroll?

> Individuals with extensive experience in network and security roles, including network administrators, network engineers, security managers, and IT managers.

> Those who have already earned lower-level Fortinet certifications, such as NSE 4 (Network Security Professional), NSE 5 (Network Security Analyst), NSE 6 (Network Security Specialist), and NSE 7 (Network Security Architect), and wish to take their expertise to the highest level.

> Individuals aiming for top-tier cybersecurity leadership positions, such as CISOs

- > Professionals who design and implement security solutions for businesses and organizations
- > Individuals with a profound interest in cybersecurity and a robust technical foundation looking to specialize in network security at an expert level.

What you'll learn in this course?

The NSE 8 certification covers a broad range of topics that reflect the comprehensive nature of Fortinet's network security solutions.

Key areas include:

- > Advanced FortiGate deployment, configuration, and troubleshooting
- > Centralized management and analytics with FortiManager and FortiAnalyzer
- > Identity and access management with FortiAuthenticator
- > Advanced threat protection with FortiSandbox
- > Integration of ecosystem components like FortiSwitch, FortiAP, and FortiWeb
- > Security Fabric architecture and implementation
- > Cloud security principles and Fortinet's cloud product integrations
- > Secure access, including SSL VPN and IPsec VPN configurations
- > Network Security Design and Architecture
- > Integrating Fortinet products into complex network environments
- > Secure Wireless and Wired Network Solutions
- > Content and Endpoint Security
- > Advanced Threat Protection Techniques
- > Cloud Security, SD-WAN, and SASE Solutions

How will you benefit from Fortinet NSE 8 Training?

Upon completion of this course, candidates will have the skills and knowledge to:

- > **Advanced Network Security Mastery**

- Deep Understanding of Security Principles: In-depth knowledge of advanced network security concepts and threats.
- Proficiency with Fortinet Technologies: Expert-level skills in configuring, managing, and troubleshooting Fortinet security solutions.

> Practical Problem-Solving Abilities

- Real-World Security Challenge Preparedness: Hands-on experience with simulating and solving complex security scenarios.
- Strategic Security Solutions: Ability to develop and implement comprehensive security strategies.

> Career Enhancement

- Elite Professional Status: Recognition as part of an exclusive group of globally acknowledged security experts.
- Expanded Career Opportunities: Qualification for senior-level positions in network security and cybersecurity.
- Increased Earning Potential: Higher salary prospects due to the elite status of the NSE 8 certification.

The Fortinet NSE 8 Certification Training not only prepares you for a prestigious certification but also equips you with the necessary skills and knowledge to excel in high-level cybersecurity roles, significantly impacting your professional growth and opportunities.

Prerequisites

While there are no formal prerequisites for attempting the NSE 8 certification, it is highly recommended that candidates have:

- A thorough understanding of network security principles and practices.
- Extensive hands-on experience with various Fortinet products and technologies.

- Completed the NSE 4 to NSE 7 certifications or possess equivalent knowledge and experience.

Fortinet NSE 8 Curriculum:

Demonstrate knowledge of FortiGate Network Security products

- Chassis solutions 6000/7000 modules and architecture
- Correct hardware production selection based on design
- FortiMail
- FortiSandbox

Demonstrate knowledge of Fortinet Security Fabric Solution deployments

- Traditional networks and hybrid/cloud/multi-cloud networks
- Logging and management protocols used by Fortinet, and required network architecture for resiliency
- Core products

Demonstrate knowledge of Fortinet high-availability solutions

- Types of the HA solutions
- HA and Cloud deployments
- Optimization

Demonstrate knowledge of FortiGate operation modes

- Transparent Mode and Layer-2 Traffic
- VDOM and VDOM links
- NP6/NP7/nTurbo/CP9/SoC4 acceleration and acceleration concepts
- Hyperscale requirements, operation, limitations
- Traffic Flows during acceleration and offloading

Demonstrate knowledge of FortiGate hardware technology

- Describe and design hardware accelerated networks with FortiGate devices
- FortiGate chassis/module architecture
- Life of packet

- **Hardware offloading**

Demonstrate knowledge of non-FortiGate hardware technology

- **Hardware v virtual**
- **FAZ, SIEM**
- **Private cloud**

Demonstrate knowledge of Fortinet solutions for cloud security

- **Public cloud**
- **SAAS**
- **SASE**

Networking

- **Static routing**
- **Dynamic routing (OSPF/BGP)**
- **Routing and high availability concepts**
- **Asymmetric routing**
- **Secure SD-WAN Routing**
- **Policy Routing**
- **Multi-cast routing**
- **Routing control**
- **Dual-bidirectional NAT between two address domains**
- **Interpret NAT information presented in Session table output**

Demonstrate knowledge of advanced routing and networking technologies

- **Dual-bidirectional NAT between two address domains**
- **Interpret NAT information presented in Session table output**
- **NAT46 & NAT 64, SLAAC, DHCPv6, DNSv6**
- **Interface-based shaping configuration**
- **Effects on hardware acceleration**
- **VWP with VLAN tags**
- **SSL VPN / IPSEC**
- **Aggregate VPN**

Demonstrate knowledge of advanced VPN design methodologies

- **ADVPN**

- **VXLAN over IPSEC**
- **GRE**
- **IKEv1 vs IKEv2 differences**
- **FortiSwitch advanced configurations**
- **MCLAG**
- **FortiAP advanced configurations**
- **Remote tunnelling**
- **Advanced use cases of FortiExtender (IPSEC VPN, VLAN mode)**

Demonstrate knowledge of Fortinet access solutions advanced configurations and features

- **IPSEC VPN**
- **VLAN mode**
- **Control Policy**
- **Device Profiling**
- **DHCP Option 82**
- **FortiNAC configuration**
- **Remediation Policy**
- **FortiAP radius based dynamic vlan**
- **RADIUS based dynamic VLAN**
- **Quarantine NAC vlans**
- **FortiLink over L3**

Demonstrate knowledge of how to integrate Fortinet access solutions

- **Wireless planning**
- **Switch stack design**
- **ZTNA solutions**
- **Fortinet Security Fabric and integrated management of Firewall, access, and ATP products**

Demonstrate knowledge of application delivery

- **Load balancing**
- **Health checks**

Demonstrate knowledge of SD-WAN advanced architecture and design

- Design and implement a full featured SD-WAN solution with dynamic routing
- Local traffic routing with SD-WAN
- Understanding SD-WAN rules and failover
- Azure vWAN

Demonstrate knowledge of SD-WAN advanced features

- ADVPN design and requirements
- Packet duplication and aggregate tunnels
- Network overlays

Demonstrate knowledge of SD-WAN troubleshooting

- Session failover with NAT
- Session route change with max bandwidth method
- Shortcut tunnels and BGP
- Azure vWAN

Security Solutions

- Operation and deployment modes
- Designing resilient solutions
- Advanced security inspection
- FortiGuard services for enhanced Fortinet solutions
- Troubleshooting application security issues
- Inspection modes
- Security profiles
- Troubleshooting FortiOS security features
- FortiGuard services for FortiOS security services
- VoIP

EXAM

Exam Name - Fortinet Certified Expert (FCX)

Exam Code - NSE8-812

Duration - 3 Hours

Cost - 400 USD

Registration - [Pearson VUE](#)

Trainer's Profile

Mr.Arfat : Fortinet Certified Trainer

Mr. Arfat is a Fortinet Certified Trainer, indicating expertise in Fortinet's range of network security products and solutions.

He possesses in-depth knowledge of Fortinet's technologies and is equipped to educate others on how to effectively use and manage these security solutions.

This certification underscores his commitment to staying current with Fortinet's offerings and sharing this knowledge with others in the field.

LAB SETUP

Training Plan & Schedule

Fortinet Certified Expert(FCX)
